EXPERIENCE

Capital Insurance Group

Remote

Software Engineer Co-op

Aug 2025 - Dec 2025

- Developed a full stack Jira plugin to automate ticket creation, saving users an average of 10 minutes per ticket.
- Designed a template management system with React, allowing users to save and reuse custom ticket structures.
- Implemented TypeScript and the Atlassian API to handle data persistence and seamless UI integration within Jira.

CTI / CodeDay - Flagsmith

Remote

Software Engineering Internship

Jun 2024 - Aug 2024

- Co-designed a real-time streaming dashboard using WebSockets and TypeScript to monitor identity data, significantly reducing SDK debugging time for developers.
- Developed the data stream backend by reusing existing identity webhooks, enabling live, dynamic synchronization between client SDKs and the monitoring interface.

California State University Monterey Bay

Marina, CA

Student Assistant

Jun 2023 - Sep 2023

- Administered weekly tutoring sessions assisting 40+ students with Python, Precalculus, Calculus, and Trigonometry.
- Guided 40+ students with projects involving Raspberry Pi Pico, including Python coding and breadboard wiring.
- Supervised a group of 12 students, ensuring 100% of students met or exceeded their academic goals.

EDUCATION

California State University Monterey Bay

Marina, CA

Bachelors of Science in Computer Science

Grad Date: Dec 2025

Concentration in Software Engineering

In Major GPA: 3.5

TECHNICAL SKILLS & ACHIEVEMENTS

- **Programming Languages:** C, Python, C++, JavaScript, TypeScript, Java
- **Frontend:** React, HTML, CSS
- **Backend/Tools:** Node, Express, Spring Boot, Git, Linux, JUnit, MySQL, Atlassian Forge
- **Relevant Courses:** Data Structures & Algorithms, Object-Oriented Programming, Internet Programming, Software Design, Design & Analysis of Algorithms, Introduction to Databases, Operating Systems, Computer Networks.
- **Dean's List:** Achieved high academic achievements Fall 2022, Spring 2023, Fall 2023, Fall 2024

PROJECTS

Programming Language Interpreter

(2024)

Custom bytecode virtual machine. *C, Compiler Design, Virtual Machines*

- Developed an interpreter for a dynamically typed language with lexical analysis, parsing, AST evaluation, and a stack-based virtual machine.
- Built a compiler translating high-level constructs into bytecode, implementing garbage collection and memory management.

Open Source Contributions - (CTI)

(2023 - 2024)

Community-driven software development. *Python, Git, Testing*

- Enhanced Documentation for google-cloud-python (Issue #11618) to provide clearer instructions and examples for developers.
- Led Collaborative Problem Solving for Open-Source Energy Project (Issue #1108), developing new test cases to verify energy consumption features.
- Facilitated brainstorming sessions to ensure solutions met performance criteria while promoting effective team collaboration.

ADDITIONAL EXPERIENCE

Corral De Tierra Country Club

Salinas, Ca

Busser

Jan 2025 - Jan 2026

- Reset tables, organized service areas, and followed service standards with strong attention to detail.
- Collaborated with servers and kitchen staff to maintain smooth service and provide support during high-volume, fast-paced shifts.
- Adapted quickly to shifting priorities, supporting teammates to keep tasks moving during busy shifts.
